

## Genomic Arabidopsis Resource Network

### Issue 9

10 Oct 2001

GARNet is organising a session at the SEB meeting, which will take place from April 8 to 12 in Swansea. The aim of this session is to update the research community on the progress of GARNet services, and also to show results that have been gained by applying tools of functional genomics.

I am looking for participants to present a paper or a poster on any aspect of functional genomics: technology development, or the presentation of biological data arising from the use of functional genomics tools in the areas of transcriptomics, protein analysis and proteomics, forward and reverse genetics, metabolite analysis and metabolomics.

The presentation does not have to be about work funded under GARNet. All presentations on work involving the use of functional genomics are of interest for this session.

If you would like to attend the SEB meeting, and especially, if you would like to participate in the GARNet session, please send me your entry form by e-mail ([kvd1@york.ac.uk](mailto:kvd1@york.ac.uk)). The entry form is available [from the SEB webpages](#).

The entry deadline is October 12.

Late entries are possible, but please check with me first. It is unlikely I can consider them for the presentation of a paper.

The deadline for receipt of abstracts is January 18, 2002. Your abstract should also be sent directly to me. Please see the SEB webpages for precise instructions on how to submit your entry form and abstract.

All the best,

Karin
